

Coronacom Pty Ltd - Overview

Company Name

Coronacom Pty Ltd

Trading as

Comm8

Inspirations

Innov8

Communic8

Integr8

Comm8 is a Joint Venture company, pooling the resources and capabilities of two long standing, successful communications companies in the Northern Territory.

The Directors of Combined Communication Solutions Pty Ltd (CCS) and Central Communications (Alice Springs) Pty Ltd (CC) have formed the new company, Coronacom Pty Ltd, trading as Comm8.

Vision & Capability

Comm8 is now the best and most versatile offering available in the Northern Territory for all communications projects.

Our vision is to provide excellent outcomes in communications projects. Our 7 core business activities are:

- Radio Communications Solutions
- Microwave Link Solutions
- Vehicle and Asset Tracking Solutions
- Towers and Rigging Services (including civil works)
- Commercial Satellite Solutions
- MATV Distribution Solutions
- Radio and Television Broadcast Solutions

We have in-house expertise in communications network engineering and design, civil and structural installation, technical installation and Commissioning and providing vital ongoing support with service contracts and maintenance available.

Comm8 is well resourced and specialise in providing reliable solutions in remote areas of Australia and the Asia Pacific. Ongoing communications contracts with the Australian Federal Police in East Timor are one example of this work with representatives from both companies attending East Timor in December 2012.

Comm8 is the perfect business to engage for major communication projects and maintenance contracts when clients expect to build long term mutually beneficial relationships. We will not compromise on the quality of our offering, in both our product recommendations and offerings or our service and technical expertise.

Comm8 is equipped with some of the latest communications test equipment and more than 130 years combined technical expertise. We have outstanding knowledge and approaches to the difficult conditions unique to the Northern Territory and remote Australia. There is no communications project or maintenance contract outside of the scope of the new venture.

Comm8 have well equipped workshops in both Darwin and Alice Springs. A combined workforce of 21 personnel provides unprecedented in-house expertise, with qualified personnel as follows:

Directly Related

- Radio Communications Technicians
- Advanced, Intermediate and Basic Rigging and Dogmen
- Tower Rescue and Twin Rope Access certification
- Open class cabling licence
- OH&S White Card
- EWP and Forklift

In-directly related

- First Aid Certificates and Perform CPR
- Advanced 4WD Operations
- Ochre Card
- Assessment & Workplace Training
- Cert IV in Frontline Management
- Cert IV in Occupational Health & Safety

Credibility

Comm8's focus is contracts, where capability and ongoing support is vital to the successful outcome of the project or maintenance contract.

Successful outcomes in significant communications projects build capability. Both companies have won and successfully deployed large wide scale solutions, such as those below.
