

Alpine

Compact Underbench Water Purification System

Features:

- Fresh tasting clean water at your fingertips
- Compact underbench system featuring “valve in head” shut off mechanism for quick and easy cartridge change
- Stylish ceramic seated designer faucet
- Supplied complete with pressure limiting anti hammer backflow prevention valve

Reduces:

- Chlorine, taste and odours
- Parasitic cysts such as Giardia and Cryptosporidium
- Sediment down to 1 micron
- VOC's in the form of herbicides, pesticides and insecticides
- Lead

ALPINE

WATER FILTRATION

Alpine Undersink Drinking Water System

Reduces:

- Chlorine, taste and odours
- Parasitic cysts such as Giardia and Cryptosporidium
- Sediment down to 1 micron
- VOC's in the form of herbicides, pesticides and insecticides
- Lead

Features:

- Fresh tasting clean water at your fingertips
- Compact underbench system featuring "valve in head" shut off mechanism for quick and easy cartridge change
- Stylish ceramic seated designer faucet
- Supplied complete with pressure limiting anti hammer backflow prevention valve

The Alpine SUTS10-2 Under Sink Water Filter System utilises effective, high absorption media for reducing common but potentially harmful impurities and improving the taste of your water. It can be conveniently installed under your kitchen sink. Improves taste and reduces contaminants causing chlorine taste and odour, sediment and Cysts.

Filtration Applications	SUTS10-2
Improves Taste by removing Chlorine taste and odour	✓
