

Annual Geriatric Health Package

University Avenue Veterinary Hospital offers Geriatric Health Profiling for your dogs and cats **7years** and over.

Many diseases that occur in geriatric animals are insidious, meaning they often show no clinical signs detectable by your veterinarian. These can include early kidney disease, liver disease, cancers and hormonal conditions. However these diseases may be picked up with blood and urine testing. With a thorough examination, your veterinarian can also discover less serious conditions such as dental disease, skin problems, ear and eye problems, arthritis and minor infections.

Geriatric Health Packages include:

- 1 A comprehensive health check with a veterinarian
- 2 Blood Health Screen (to test for major organ function or disease.)
- 3 Urinalysis (detects disease such as diabetes, infections, Kidney and bladder disease.)
- 4 ½ day hospital admission (for blood and urine medical work up)
- 5 10% discount on any prescription diet recommended by the veterinarian.
- 1 Valued at over \$240.00, University Avenue Veterinary Hospital has put this package together for your convenience.

Total cost of \$132.50

Consultation by appointment only. Please call the clinic if you are interested in this offer and make an appointment with one of our friendly Veterinary Nurses.
