Accessories

Call us on 13 62 63 or visit www.bnd.com.au for the complete range of B&D products and accessories.

4 BUTTON TRANSMITTER

Now everyone in the home can enjoy the convenience of the garage door opener, with extra 4 button transmitters available.

2 BUTTON WATER RESISTANT TRANSMITTER

The 2 button transmitter's water resistant design, is perfect for motorcyclists, outdoor workers who may get wet, boat users or fisherman, etc.

ENTRY KEYPAD

Allows entry to the garage without a transmitter. Great for children. No need to give them a key or transmitter, they can enter the house with their PIN number.

WALL BUTTON TRANSMITTER

Allows remote door operation. No wiring required, and can be mounted inside the garage.

EMERGENCY KEY RELEASE OR COMBO ACCESS DEVICE

Allows an opener to be disengaged so the door operates manually from outside the garage. It is recommended for use where the garage door is the only point of entry to the garage.

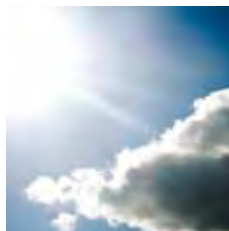

SAFETY INFRA-RED BEAMS

If you have young children or pets, the addition of safety infra-red beams provides added safety and security, as the door will automatically stop and reverse, if the beam is broken whilst the door is closing. B&D always recommend the use of safety infra-red beams on all automatic garage doors.

RECHARGEABLE BATTERY BACK UP

If power supply to the opener is broken, the door will still be operational with the rechargeable battery back up.

SOLAR POWER SYSTEM

Back up battery can be charged via solar power to operate your garage door opener, saving electricity and the environment. Great for use in sheds or garages with no electricity supply.

SECURITY SYSTEM COMPATIBLE

B&D Openers are able to be wired to alarm systems. This allows your handheld opener transmitter to arm and disarm the alarm.

EXTERNAL ANTENNA

Suitable for areas that are prone to poor reception. This item can be added to increase the range of the transmitter.

YOUR **B&D REPRESENTATIVE** IS:

B&D Doors has offices servicing all states.
